Profile

Full-stack developer with 6 years of experience on web and mobile applications in production. Vue.js and TypeScript on the front end, Node.js and Django on the back end, through to deployment (Docker, GitLab CI/CD, Kubernetes / FluxCD). Several technical migrations delivered (Vue 2 to Vue 3, gRPC to REST), micro-service architectures, work with product, business and back-end teams. I build AI into shipped products: Claude API, MCP servers, team tooling with Claude Code. Alongside my job, I teach web development at Lyon 1 University and publish my own apps (DishRank on the App Store and Google Play, babyNamed on the web).

Professional experience

Full Stack Developer · SOCOTEC, Lyon and remote

June 2026 – Present

- The group's atmospheric-emission measurement application: offline-first PWA (IndexedDB) for field campaigns, lab order forms and regulatory reports
- Front-end migration from Vue 2 / Vuetify 2 / Vuex / webpack to Vue 3 / Vuetify 3 / Pinia / Vite (about 300 files), then stabilisation in production
- Asynchronous report generation: report service moved from gRPC to REST, Celery workers, Kafka events, GitOps deployment (FluxCD / Kubernetes)
- Decommissioning of the Django back end's gRPC layer in favour of documented REST APIs (DRF, OpenAPI)
- Django / DRF back end: calculation engine and regulatory deviation detection, hardening (timeouts, N+1 queries, async tasks)
- Team AI tooling: contributions to the internal Claude Code plugin (security / DRF / migration review rules, secrets hook, production audit)

Stack Vue.js 3 · Vuetify · Vite · Pinia · Django / DRF · Celery · Kafka · PostgreSQL · Docker · Kubernetes / FluxCD · GitLab CI · Sentry · SonarQube

Full Stack Developer · SOGEDO, Lyon

November 2025 – June 2026

- Refactor of the internal plugins (auth, core, components) from Vue 2 to Vue 3 (Composition API): progressive migration and technical debt reduction
- Introduction of TypeScript and standardised typing across all new modules
- Private npm package with a CLI to scaffold code and initialise projects
- GitLab CI/CD pipelines with GitLab Runner (lint, tests, build, versioning, deployment) to secure production releases
- Close collaboration with the .NET back-end and business teams

Stack Vue.js 3 · TypeScript · Node.js · Vitest / Jest · GitLab CI/CD · .NET · private npm · CLI

Full Stack Developer · SYSTRA (formerly Modaal), Lyon

October 2023 – November 2025

- Architecture of GIS applications handling 10M+ cadastral parcels (Vue 3, Node.js, PostGIS)
- Business process automation in Python and PowerShell: about 30% time saved
- Integration of AI object-detection models on aerial imagery
- Redesign of authentication and rights management (RBAC)
- Docker / GitLab CI/CD pipelines with automated tests and continuous deployment
- Direct work with Product Owners, structuring of Agile practices

Stack Vue.js 3 · TypeScript · Node.js · PostGIS · Python · Docker · GitLab CI/CD

Apprentice developer · Modaal, Lyon

2020 – 2023

- Complete architecture of a GIS application (Vue.js / Express / PostgreSQL)
- Python ETL processes over 5 GB+ files (cadastre, building permits, property values)
- Secured REST APIs with schema validation on geospatial data; functional and technical specifications with the product team

Stack Vue.js · Express · PostgreSQL / PostGIS · Python · Docker

Part-time lecturer in web development · Claude Bernard University Lyon 1 — January 2025 – Present

- Alongside my main job: 30-hour module for 100+ undergraduate students (Computer Science and Health), covering HTML / CSS / JavaScript, Vue.js 3, TypeScript, REST APIs, Go and project architecture
- Course materials, hands-on exercises and assessments

Freelance full-stack developer · Self-employed, Lyon and remote — 2021 – Present

- Alongside my main job: 15+ websites and tools shipped end to end for clients (design, development, deployment, maintenance), with Vue.js, React / Next.js, Node.js, Python and Firebase
- Own products published and maintained in production, detailed below

Projects & products

- **DishRank** (2026). Dish-rating app published on the App Store, Google Play and the web, in 5 languages: city rankings, friend groups, outings and shared lists. Designed, built and published solo. React Native / Expo, Next.js, Supabase, TypeScript. dishrank.fr
- **babyNamed** (2026). App to pick a baby name together, blind: each partner sorts names on their own and only the names everyone likes show up. 21,197 first names from INSEE birth data, enriched from Wikidata and Wiktionary; eight languages, passkey sign-in, Stripe payments, Expo shell for iOS and Android. Nuxt, Cloudflare Workers and D1, Python. babynamed.fr
- **Omnichannel messaging for tattoo artists** (2026). WhatsApp, Instagram, Messenger and email in a single Chatwoot inbox; reply drafts generated by the Claude API and approved by the artist before sending. In production. Node.js, PostgreSQL, Claude API.
- **Damn Claude** (2026). Open-source, local-first training and nutrition tracker: data stays on the phone, Withings connected scale, passkey sign-in. An MCP server lets Claude read the data and suggest adjustments, approved one by one in the app. Nuxt 4, TypeScript, 1,400+ tests. github.com/Gregoire63/damn-claude
- **ETF PEA** (2026). Tracking and analysis of PEA-eligible ETFs: dashboards, fund comparison, portfolio tracking. Next.js, Tailwind CSS. etf.gregoire-raturat.fr

Technical skills

Frontend: Vue.js 3 / Nuxt, React / Next.js, TypeScript, Vuetify, Tailwind CSS, Pinia, Vite, offline-first PWA (IndexedDB), OpenLayers

Backend: Node.js (Express, Fastify), Python (Django / DRF, FastAPI), REST APIs / OpenAPI, micro-services, PostgreSQL / PostGIS, Supabase, MongoDB, Celery / Redis, Kafka

AI & agents: Claude API (Anthropic), MCP (servers and clients), Claude Code (skills, plugins, hooks), object-detection models, data pipelines (INSEE, Wikidata)

Mobile: React Native, Expo / EAS Build, App Store / Play Store publishing, push notifications

DevOps & tools: Git / GitLab CI/CD, Docker, Kubernetes / FluxCD (GitOps), Nginx, Linux, Netlify / Vercel / Cloudflare, Sentry, SonarQube, private npm packages, CLI tooling

Testing & methods: Vitest / Jest, pytest, Playwright / Cypress (E2E), code review, Agile Scrum / Kanban, authentication (OIDC, JWT, RBAC, passkeys), functional and technical specifications

Education

2024 · **Vue.js Certified Mid-Level Developer**, official Vue.js certification

2021 – 2023 · **Master's degree, Information Systems Expert**, ISITECH, Lyon
AI & Big Data, Infrastructure & Cloud

2020 – 2021 · **Bachelor's degree, IT Project Manager**, ISITECH, Lyon

2017 – 2020 · **Bachelor of Computer Science**, Université Clermont Auvergne

Languages and interests

Languages: French (native), English C1

Interests: Basketball, weight training, chess, board games, travel, volunteering
